Subject: Withdrawal from Tyre Supply – European Championship 1:8 GT in Leipzig

Dear Organizers,

Following your communication, we would first like to thank you for the clarity and transparency with which you conveyed the decision to change the official tyre supplier for the 2025 edition of the European Championship 1:8 GT.

We fully share your attention to safety, quality, and reliability—values that have always guided our work. In this regard, we wish to inform you that following an internal meeting held earlier this morning, we had already decided to send an official notice announcing our voluntary withdrawal from supplying tyres for the event.

As previously mentioned, after the issues encountered during the recent round of the Italian Championship, we conducted a thorough technical analysis of the tyres used. The inspection revealed a defect rate of approximately 5% of the total. Despite the in-depth investigation, we were unable to identify a clear technical cause, and therefore cannot implement the necessary corrective actions in a short timeframe.

We believe it is our duty—out of respect for the organization and drivers—to step back from the 2025 Championship supply, as we are currently unable to ensure the quality standards required for such a prestigious event.

We are already working on identifying structural and lasting solutions that will allow us to restore the full reliability of our products. We appreciate your openness to reconsidering a future collaboration for 2026 and are committed to providing the necessary technical guarantees in the coming months.

We remain at your full disposal for any further clarification or technical discussion and thank you once again for your cooperation and understanding.

Sincerely,
Laura Pauselli
